28. Description of Change: (use additional Sheets if necessary)
The tools group recently obtained a permanent copy of Rational Rose 98. This product needs to be available for development use, replacing the demo version.

29. Proposed Solution: (use additional sheets if necessary)
Request that Rational Rose 98 be installed on the Tools Group server "mars". This machine has been analysed and meets the minimum needs for Rational Rose 98. Which are: 320m RAM, 650m swap space. This does however, put it close to the maximum available to the server so we would like RTSC to monitor "mars" performance for the next week or two so we can have a better idea if we will need to ask for additional memory/disk space.

30. Alternate Solution: (use additional sheets if necessary)
None

31. Consequences if Change(s) are not approved: (use additional sheets if necessary)
If this is not done, the developers will be unable to use Rational Rose 98 .
